Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 1, 2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claim 56-87** are rejected under 35 U.S.C. 102(e) as being anticipated by Brookler et al. (US 6,754,666 B1), hereinafter "**Brookler**".

As per claim 56, Brookler teaches a method comprising:

- "associating an item with a class" at Col. 7 line 67;

Art Unit: 2166

- “wherein the class comprises associated attributes that describe members of the class” at Col. 7 line 66;
- “said associating the item comprises selecting the class such that each associated attribute has a non-null value in describing the item” at Col. 5 lines 1-12;
- “storing a first record associating the item with the selected class” at Col. 10 lines 4-12 and Figs. 4-10;
- “storing a second record associating the item with each associated attribute of the class and a value of the attribute describing the item” at Col. 10 lines 4-39 and Figs. 4-10.

As per claim 57, Brookler teaches the computer-implemented method of Claim 56 wherein “said selecting the class further comprises: selecting the class from a class hierarchy, wherein the class hierarchy comprises child classes and associated parent classes, and a child class inherits each attribute of the associated parent class” at Col. 8 lines 45-49.

As per claim 58, Brookler teaches the computer-implemented method of Claim 57, wherein “the associated attributes of a child class further comprise an additional set of attributes not inherited from the associated parent class” at Col. 11 lines 1-15.

As per claim 59, Brookler teaches the computer-implemented method of Claim 58 wherein "said selecting the class further comprises: determining a class in the hierarchy that has associated attributes necessary to describing the item" at Col. 11 lines 17-60.

As per claim 60, Brookler teaches the computer-implemented method of Claim 56, wherein "said storing the first record is to a first memory structure, and said storing the second record is to a second memory structure" at Figs. 4-10.

As per claim 61, Brookler teaches the computer-implemented method of Claim 60 wherein "the first and second memory structures are distinct from one another" at Figs. 4-10.

As per claim 62, Brookler teaches the computer-implemented method of Claim 60 wherein "the first and second memory structures are tables in a database" at Figs. 4-10.

As per claim 63, Brookler teaches the computer-implemented method of Claim 56 wherein "the associated attributes are metadata of the class" at Col. 8 lines 10-30.

Claims 64-87 are directed to apparatus, system and computer storage medium for performing similar method as in claims 56-63 and are therefore rejected by the same reasons.

Response to Arguments

4. Applicant's arguments with respect to claims 56-87 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Examiner's Note: Examiner has cited particular columns and line numbers in the references applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.

In the case of amending the Claimed invention, Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure

relied on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

The prior art made of record, listed on form PTO-892, and not relied upon, if any, is considered pertinent to applicant's disclosure.

If a reference indicated as being mailed on PTO-FORM 892 has not been enclosed in this action, please contact Lisa Craney whose telephone number is **(571) 272-3574** for faster service.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh B. Pham whose telephone number is (571) 272-4116. The examiner can normally be reached on Monday through Friday 7:30am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hosain Alam can be reached on (571) 272-3978. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
